The new improved sound gives the Larvik mirror a solid bass and a clear treble. Connect your phone or tablet wireless via Bluetooth to the mirror and enjoy your favourite music or podcasts while spending time in the bathroom. The cabinet is matte white powder-coated aluminium with a 45mm LED frame. The light can be regulated in colour and in brightness. The integrated demister pad heats the mirror to a few degrees above room temperature within 2-3 minutes to reduce the mist on the mirror.
