

# YUNO

# YUNO RAIL

A SPECIAL PLACE FOR THE TOWEL

YUNO is made of 100% Acovi® composite. At Copenhagen Bath we give a 10 year warranty on colour.

The smooth design is made for maximum durability. The pore-free material makes it very easy to clean and maintain.

YUNO RAIL gives the basin a new touch with the black towel rail in stainless steel. The basin is wall mounted, with mounting brackets included. The faucet can be placed on the side of the basin or on the wall.

# YUNO CA

Winner - red dot design award 2017

Gold - German Design Award 2018

German Design Award 2018

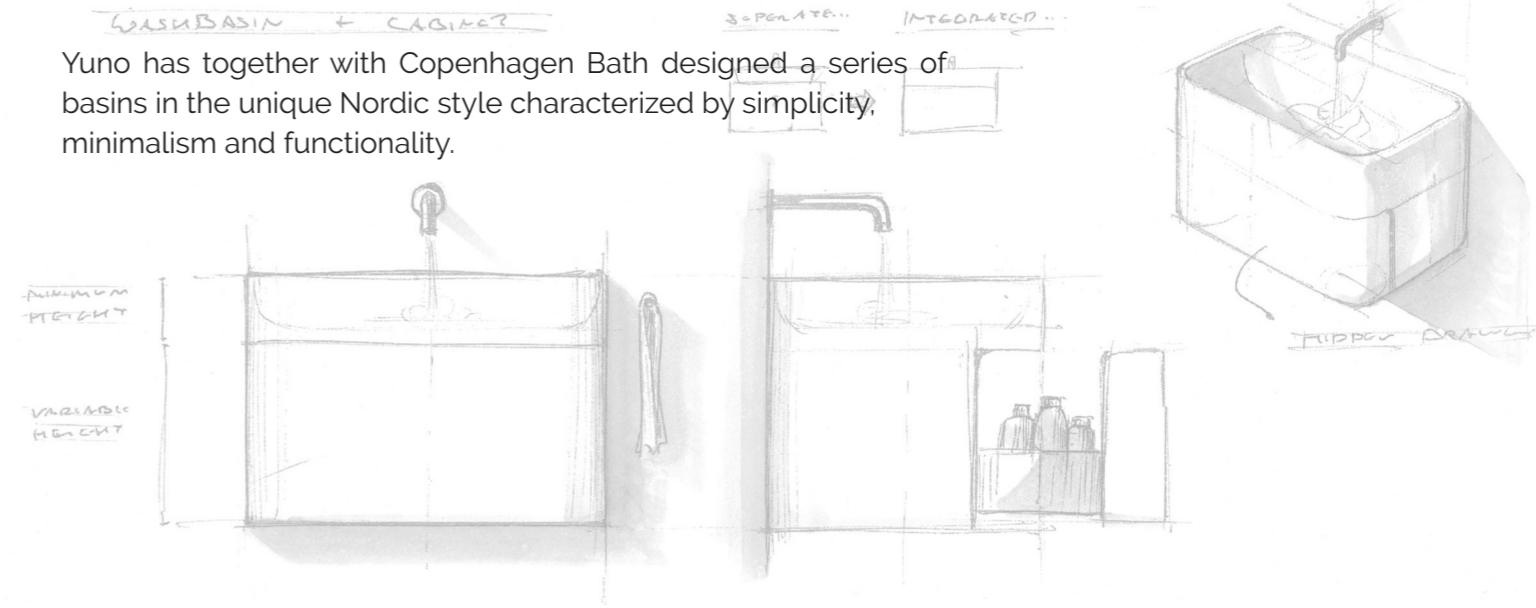

## YUNO DESIGN

The award winning designer duo Lena Billmeier and David Baur joint forces and founded their own product design studio in 2012.

Important within their work is to create simple and timeless yet emotional products, with a strong and distinctive brand image. Working hands-on with mock-ups, prototypes and experimenting with materials is a vital part in their design process.

In combining their german roots with global influences they aim to challenge themselves to create fresh, innovative and beautiful design projects.

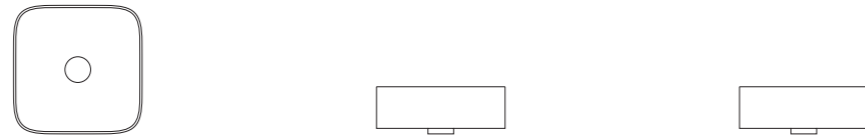

Yuno has together with Copenhagen Bath designed a series of basins in the unique Nordic style characterized by simplicity, minimalism and functionality.

WA - Wall mounted. Brackets included.

CA - Wash basin with drawer. Brackets included.

All basins are exclusive waste and trap.

Please note that the CA models need a special membrane trap (Copenhagen Bath Senzo trap, 40040094)

## TIME FOR YOU

The time you spend in your bathroom should be about a moment of peace – TIME FOR YOU. This is our philosophy and the mission behind the Copenhagen Bath design. We offer not only great visual design but also functionality and mentally quiet and characteristically simple Scandinavian style.

Our own Acovi® is 100% solid composite and is a completely pore-free material, that can be cast, shaped and even cut very thinly. This gives us amazing and unique possibilities when creating beautiful bathroom furniture. It withstands the wear and tear of time and splashing water. Always easy to clean and maintain which makes it perfect for the wide range of products, like wash basins, bathtubs, cabinets and shelves, that Copenhagen Bath offers.
